

Stanford Neurosciences Institute

Seminar Series Fall 2018

Thursdays at 12pm, Clark Center Auditorium

- | | | | |
|--------|--|--------|--|
| Sep 27 | Elizabeth Hillman
Columbia University
<i>High-speed imaging of whole-brain activity</i>
Host: Audrey Fan (Zaharchuk lab) | Nov 8 | Konstantinos Meletis
Karolinska Institute
<i>Organization and function of circuits that regulate motivated behaviors</i>
Host: Jun Ding |
| Oct 4 | Anders Dale
University of California, San Diego
<i>Integration of quantitative imaging and genetics for precision health</i>
Host: Brian Wandell | Nov 15 | Hailan Hu
Zhejiang University
<i>Neural mechanisms of social and emotional behavior - from pecking order to ketamine</i>
Host: Aaron Gitler |
| Oct 18 | Florian Engert
Harvard University
<i>Neuronal mechanisms of evidence accumulation and decision making in the larval zebrafish</i>
Host: Andrew Shuster (Luo lab) | Nov 29 | Hal Blumenfeld
Yale University
<i>Brain mechanisms of normal and impaired consciousness</i>
Host: Jin Hyung Lee |
| Oct 25 | Marisela Morales
National Institute on Drug Abuse
<i>Neuronal diversity in the ventral tegmental area</i>
Host: Konstantin Kaganovsky (Ding lab) | Dec 6 | Marla Feller
University of California, Berkeley
<i>Influence of light on the neonate retina</i>
Host: Sui Wang |
| Nov 1 | Diane Lipscombe
Brown University
<i>RNA and DNA binding proteins control the composition of calcium channels in nociceptors in normal and neuropathic pain states</i>
Host: John Huguenard | Dec 13 | David Kleinfeld
University of California, San Diego
<i>Signals and circuits for brainstem control of active sensing</i>
Host: John Huguenard |
